

**Elevated Monitor System**  
**Supported from up to 111' (33.8 Meters)**  
**2.50", 3.00" & 4.00" Monitor Sizes**  
**(60, 75 & 100mm)**  
**Part # 102999**

The Stang Elevated Monitor System has been the industry standard for well over 40 years. The 102999 series system is a supported water tower available up to 111' (33.8 meters) in height. The monitor waterway sizes are 2.50", 3.00" or 4.00" (60, 75 or 100mm). The unit is manually controlled from ground level via a control handle which rotates a vertical & horizontal axis. The operator never has to leave ground level to operate, activate or do routine maintenance on this unit. These units require reaction supports every 20' (6.0 meters) attached to a support structures. This allows the units to reach 111' (33.8 Meters).

There are various options available for these systems which include shaper tip nozzles, hydraulic nozzles, manual fog/stream nozzles and remote swivel grease kits.

**Features**

- Aluminum Bronze Swivels
- Full 360° Horizontal Rotation & +45°/-45° Vertical Travel
- Horizontal Rotation & Vertical Travel Locks
- Electro-Galvanized Water Column
- Monitor Finish: Epoxy Coat
- Various Nozzle Options
- Remote Swivel Grease Kit
