

Elevated Monitor System
Freestanding from 23' to 42' (7.0-12.8 Meters)
2.50", 3.00" & 4.00" Monitor Sizes
(60, 75 & 100mm)
Part # 103377

The Stang Elevated Monitor System has been the industry standard for well over 40 years. The 103377 series system is a freestanding (unsupported) water tower available from 23' to 42' (7.0-12.8 meters) in height. The monitor waterway sizes are 2.50", 3.00" or 4.00" (60, 75 or 100mm). The unit is manually controlled from ground level via a control handle which rotates a vertical & horizontal axis. The operator never has to leave ground level to operate, activate or do routine maintenance on this unit.

There are various options available for these systems which include shaper tip nozzles, hydraulic nozzles, manual fog/stream nozzles and remote swivel grease kits.
