

**Fog Nozzle Cable & Handle Kit
For Elevated Monitors
Part # 104825-XX**

The Stang Fog Nozzle & Cable Handle Kit is required for all elevated monitor nozzles. Stang cable operated fog nozzles require cables to actuate from fog flow to straight stream. When installed on a system, the pulling of the fog handle makes the nozzle travel in. The opposite handle will travel up. Reverse this action will make the nozzle travel in the opposite direction and give a straight stream flow. These kits are furnished with handles, cables & hardware.

Includes:

- Fog & Steam Handles
- Cables
- Hardware

Part Number is as follows:
104825-1-XX where XX is the height of the elevated monitor.

Cables used to actuate fog nozzle
