

**Spring Loaded Auto Drain Valve
With 3/4" NPT Inlet
Part # 104979-XX**

The Stang Spring Loaded Auto Drain Valve is an adjustable auto drain that will open at various pressure settings. This unit was designed to automatically drain a column of water in Stang Elevated Monitor equipment but can also be used to drain standard equipment. When ordering please specify the height of water column and that will be the last dash number of the unit.

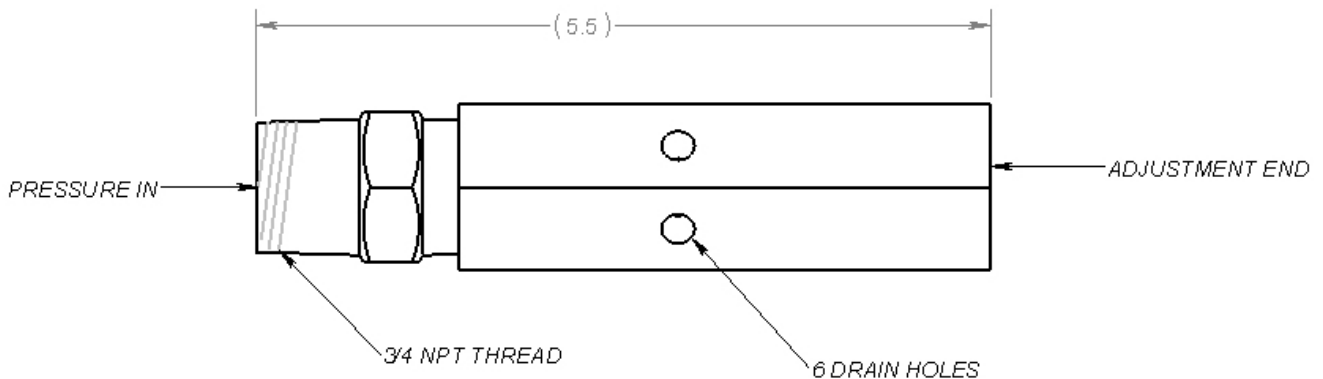

Generally the unit is factory preset at a given pressure setting. There is an adjustment screw at the end of the unit that allows for fine tuning or changing the pressure for other applications. Unit can be mounted in horizontal or vertical positions. Use 105070-1 adjusting tool.

Features
